Blended JA Program Implementation Instructions

Login Instructions:

- JA <https://learn.ja.org>
- Enter user name and password
- Click **JA Learning Platform**, top left of your screen
- Under **My JA Courses**, click on **Programs**, which will expand as a drop down to show you your assigned class, click on class link at access the program materials

Program Materials:

There are several sections of available resources listed online; you will not need to utilize many of the sections as they are links to the printed materials you'll receive in your JA kit. Throughout your Guide note that the delivery model we are using is "Projection Mode", where the lessons are presented to the class as a whole on the classroom Smart Board, not "Direct Access", which is used when each individual student participates via a laptop or Chromebook. The Guide for Volunteers and Teachers you received in your materials kit contains information for the full program, along with additional add-ons labeled as a "Deeper Dive" and/or "Extended Learning Opportunities". Volunteers and teachers can determine together if any of the additional materials are to be presented.

Student Resources – Not needed, used only for Direct Access delivery where each student logs on using a tablet to access the lesson materials.

Student Surveys – Not needed, used only for Direct Access delivery where each student logs on using a tablet to access the lesson materials.

Projection Files – Numbered one through five+ (depending on program), these are the slide deck presentations for each lesson. Click on either the link for the lesson or the arrow to the right of the lesson name, when you then click to run the program it will open the presentation in a new tab.

Volunteer & Educator Resources – You may ignore the downloadable documents listed in this section, feel free to view if you wish but you already have the printed materials provided in your JA kit bag. If applicable, the teacher will be instructed to administer the Pre and Post Tests to their students outside of the volunteer's class time. Please note there are video tutorials for each lesson providing instruction on presenting the lessons, I recommend viewing these as part of your preparation!

Classroom Materials – Not needed, your kit bag contains all the student handouts used in the lessons and activities.
